## Vietnam

### Rice Price - Weekly

**2010**

**Approved By:**

Quan Tran

**Prepared By:**

Michael Riedel

**Report Highlights:**

Export prices for 15 percent and 25 percent broken rice decreased again last week, due to near-absent buyer demand; these types of rice represent a major proportion of the total Autumn crop production of the Mekong River Delta. Export prices for 5 percent and 10 percent broken rice were unchanged compared with the week before, since lower quantities are available, and because there is more demand for these kinds of rice in the African market.

Paddy prices were unchanged last week, due mainly to the ongoing harvest of the Autumn crop in the Mekong River Delta.
